Warendorf
Equine Solarium

This is what you may expect from the Warendorf solarium

Our customers are placing increasing demands on functionality and efficiency. The engineers at EQUINE SOLARIUM WARENDORF address these requests in a perfect manner. Flexible design, high power output, exemplary ease of use via a single control unit and intelligent warm air showers are the hallmarks of their premium solaria.

Quality without compromise
High-quality materials, excellent workmanship, harmony of form and function, commendable ease of handling: horse solaria from WARENDORFER SOLARANLAGEN are a class of their own.

Dedicated solar radiation for every demand WARENDORFER SOLARANLAGEN has adopted a modular design concept that ensures perfect adaptation to specific installation conditions, demands and budgets. Existing systems can be upgraded at any later date.

We welcome your challenge

Why horses need sunlight

Read what enthusiastic users of WARENDORFER horse solaria say:

- Quicker drying of horses
- Decomposition of lactic acid and metabolic slags
- Natural production of vitamin D3
- Improved elasticity and performance
- Reduced susceptibility to infectious diseases
- Improved blood circulation
- Better breeding results
- Warming-up and conditioning of muscular tissue and tendons

STANDARD I - S

Ample power in the smallest space

Power is not necessarily a matter of size.
Our STANDARD I-S model is the best proof.

- . Total IR+UV power: 2,600 Watts
- . 8 IR bulbs x 250 Watts each
- . 2 UV bulbs x 300 Watts each

Double-pack performance

With two powerful units the STANDARD II-S model provides especially uniform and intensive radiation.

- . Total IR+UV power: 5,200 Watts
- . 16 IR bulbs x 250 Watts each
- . 4 UV bulbs x 300 Watts each

STANDARD II - S

The superior triple set
PRIVILEG-S is our premium model for demanding performance requirements. It comprises three solarium elements for optimum field radiation.

- . Total IR+UV power: 7,800 Watts
- . 24 IR bulbs x 250 Watts each
- . 6 UV bulbs x 300 Watts each

Welcome to the luxury class
 Field UV radiation or concentrated power: LUXUS-S comes with tilting side elements to provide just the right setting for every demand.

- . Total IR+UV power: 7.800 Watts
- . 24 IR bulbs x 250 Watts each
- . 6 UV bulbs x 300 Watts each

Control unit included as standard
 All WARENDORFER horse solaria are supplied complete with our user-friendly control unit. The clearly structured operating element is ready for use with all model versions.

- ACCESSORIES

Additional Neck element

Warm air shower

Shorter drying times, less power consumption: the intelligent warm air shower system sets new standards in terms of efficiency and economy. Each element integrates three high-performance fans which draw in ambient air and compress it using the hot exhaust air from the lamps. The warm air then passes through the lamp openings, thereby intensifying the heat radiated onto the horse for reduced drying times.

Motorised lift for all model versions

Four automotive industry safety belts ensure safe and uniform lifting and lowering of the solarium. The quiet-running electric motor features adjustable end stops and a free-fall safety brake.
